What is EarAmp? With new ways to communicate and a new technology affecting the way society interacts with itself and with each other, it becomes important to know how to protect what you say. Your First Time Playing Before you press play, itâ�s important to be aware of whatâ�s going on. During your first time playing, youâ�ll notice little sounds that arenâ�t there in the recording. If you like what you hear, continue listening. If you donâ�t, donâ�t hesitate to stop playing and try something else. Overwhelming Sound - What Is Sonic-induced nausea is not uncommon when first hearing music. Our brains process information in a unique way when listening. Hearing sound for the first time is an emotional experience with many physical consequences. This effect can be alleviated by learning how to listen to music. During your first time listening, you can expect to hear loud sound and sound that resembles a ringing in your ears that will subside over time as your brain acclimates to the new sounds. What You Will Hear Depending on the instruments or artists, you may hear the following sounds during your first time listening: Loud or High-pitched sounds, like string players, brass players, trumpets, and woodwinds, will generally have higher frequencies than low-pitched instruments, like tubas, flutes, and basses, that will have lower frequencies than higher pitched sounds. Ringing in your ears - This sound is the most common experience. It can last for minutes or hours, depending on how often you play. What is an EarAmp? What Is How to Protect What You Say Sonification The more you listen, the easier it will be to understand the music. EarAmp acts as a firewall between harmful and harmless sound. It acts as a sensor, transforming sound into data, then back into sound. This technology translates audio content from whatever form into data and back into sound. It starts with what you say. Creating EarAmp While we can hear through our hearing, we can also listen through our feet. The emerging technology of sonification allows for the conversion of audio content from a variety of e79caf774b
